

BruxZir®

SOLID ZIRCONIA CROWNS & BRIDGES

*Reasons to consider
BruxZir Solid Zirconia*

- ❖ **BruxZir** is virtually chip-proof, making it ideal for bruxers who have destroyed natural teeth or previous restorations
- ❖ More esthetic than metal and full-cast gold crowns
- ❖ Zirconia has proven biocompatibility, having been used in medical implants

BruxZir®
Virtually Unbreakable

High-Strength Crown Options

BruxZir[®] Solid Zirconia is made from biocompatible, virtually unbreakable monolithic zirconia. Because **BruxZir** is a full-contour restoration with no porcelain overlay, it is more resistant to chipping, cracking or breaking in the mouth. This makes **BruxZir** ideal for bruxers, who have broken their natural teeth or porcelain dental restorations in the past.

Dentists have long relied on full-cast gold and porcelain metal crowns & bridges for long-term durability and strength. But with the introduction of **BruxZir**, an equally strong solution is now available. What's more, when compared side-by-side to full-cast gold and porcelain metal crowns, **BruxZir** Solid Zirconia is the most natural-looking choice.
